

Advanced Trauma Life Support (ATLS) 10th Edition Course

Approved by the Royal College of Surgeons of England

2021 – Dates TBC

ATLS® teaches a safe reliable method for immediate management of the injured trauma patient. ATLS® is a multidisciplinary course enabling a standardised language of trauma care across the specialties.

This is a highly-interactive course combining interactive discussions and demonstrations, scenario stations and triage. Upon completion of the course, participants will be able to:

- ☐ Demonstrate the concepts and principles of the primary and secondary patient assessments.
- ☐ Establish management priorities in a trauma situation.
- ☐ Initiate primary and secondary management necessary for the emergency management of acute life threatening conditions in a timely manner.
- ☐ In a given simulation, demonstrate the skills related to ABCD which are often required during initial assessment and treatment of patients with multiple injuries.
